Printer Utility™

SET YOUR COMPUTER GRAPHICS TO PAPER USING YOUR OWN PRINTER!

Super Sketch PRINTER UTILITY software provides a simple means of printing computer graphics you have created using the SUPER SKETCH pad and its GRAPHICS MASTER software.

Color or black and white prints can be obtained based on the printer being used. Use the "change printer" routine to tell this software which printer you are using. Even black and white printers give realistic prints because each color is given a print pattern (or texture). A texture editor is provided so you can create textures which bring out the best in your drawings.

A directory of graphics is provided when loading a picture from disk. The loaded picture may be viewed without printing and your selection changed if desired. The size of the print may be varied independently . . . horizontally or vertically.

Picture Translators for other popular graphics packages are also available on this disk. They will allow you to print pictures that were not originally created using Super Sketch.

CONTROLS

Printer utility commands are accessed strictly through the keyboard. Graphics are produced using the standard Graphics Master software which comes with your Super Sketch tablet or other popular graphics software. If a portion of the picture is desired to print (rather than the whole picture) the Super Sketch pad is required.

EQUIPMENT REQUIRED

Your printer, a Commodore 64 computer, disk drive, and your Super Sketch tablet are all that are needed to create and then print your computer graphics.

PRINTERS SUPPORTED:

The following list of printers are those specifically supported with this software. Many printers not listed here will work with this printer utility software if they state compliance with a printer listed. *(Example: many printers state they work just as the Commodore 1525 printer does. If you select the CBM 1525 when you initialize your software, your printer should work.)*

Commodore 1525
Commodore 1526
MPS-801
Okimate 10
Epson MX-80
Epson FX-80
Epson RX-80
Epson MX-100
Olivetti PR-2300
Commodore 830
Brother HR-15/HR-25
Star Power Type
Gemini 10X
Gemini 15X
Delta 10
Delta 15
Microline 82A
Microline 92
Radix 10
Radix 15
Transtar 315
